DETAILED ACTION

This Application has been examined. The claims 1 and 3-20 allowed.

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to pointing device comprising: a housing substantially shaped to fit a finger of the user, a click sensor disposed within an underside of the housing, the click sensor actuated by the user pressing the underside of the housing through the finger against a first external surface with sufficient force; and a optical sensor disposed within a surface of the housing, the optical sensor detecting relative movement of the surface of the housing along two axes against a second external surface caused by relative movement of the finger of the user. The combination of the prior art of Hayashi (JP 08-054980), Uminaga (JP 01-136225) and Vance et al. (US 2001/0040550) show a similar invention, however, they fail to teach that the housing shaped to fit a finger of a user and ending in grip, a shape of the housing and the grip promoting normal usage of a tip of the finger of the user while the finger is inserted into the housing, including a touch-typing as claims 1, 14 and 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
